

"CAMOUFLAGED" Attractions Next Week At Capital's Playhouses

(Continued from Page Thirteen.)

gram also indicated that within a hundred paces from the corner of the Capitol, and in the direction of the towers, was a tower-like opening through which they could gain entrance to the basement.

Following directions, they immediately went to the camouflaged intake, climbed the trees, and leaped over the top of the air shaft. To their extreme surprise and delight they found a little triangular cart lying flat against the screen. One of them folded it carefully and placed it in a hidden pocket of his coat. Trying open the screen, they dropped down into the air shaft and rushed into the sub-basement of the Capitol. By using old furniture and desks, which they found stored there they effectively blocked all entrances to the secret chamber through which Maeline had been carried.

"The figure that had previously shot down from the edge of the dome so swiftly was none other than Lieut. Frank Kimball. He was assigned by his commanding officers to make some new experiments with wireless telephony for guiding maneuvers of aircraft. He had heard the piteous cries of friendly voice from the depths of this huge water vault. He rushed through the dismal recesses of the basement only to find all doors bolted. His eyes finally fell upon a large coil of rope, used perhaps to fence off the crowds on eventful days when the President goes before Congress or the Marine Band holds a concert on the steps of the Capitol. He climbed hastily back to the dome with this rope and began lowering it coil by coil.

"Fasten it securely about your waist, Maeline," he shouted.

"Now, hold tight!" he called.

Just as he began to draw the rope up with its precious freight, the wily Maeline who had stealthily pursued the lieutenant stole up behind him, put his foot on the rope and pushed Kimball into this seemingly bottomless pit.

To be continued tomorrow in a chapter written by J. I. Bell, foreman of The Times composing room.

FOLLOWING THE TRAIL OF "CAMOUFLAGED"

By GEORGE H. DONOHUE.

Congressman Baer declares that the triangle was not burned to a white ash as Beatrice Fairfax had described. The Congressman from North Dakota, who has been one of the most intricate problems in this remarkable narrative to date—the southerly trend of the wind, the fluttering piece of white paper, and its final resting place on the

hidden intake of the National Capitol, all cleverly interwoven with the appearance of Mrs. Thayer, the grilling arraignment by Wu Tsang of Fuller and Snyder, the return to the Connecticut avenue house, the capture of Knowles and Henderson—and it does seem these two officers certainly are having an unfortunate series of happenings—the quick change from the ivy-covered temple to the mysterious houseboat with its wireless and hidden center hole through which the turret of a strange submarine is decked—the transfer of Knowles and Henderson to this uncanny craft, and the final terrible catastrophe which befalls Maeline in her search for the Senator at the National Capitol, and her attempted rescue by the every ready Kimball—all bring the story to a point today which will require all the resourcefulness of J. Irving Bell to untangle in Chapter XI tomorrow. Incidentally Mr. Bell, as foreman of The Times composing room, will undertake a novel feature in connection with the presentation of his story. He will not only write Chapter XI, but he will also set the type on the Linotype machine, read proof on his own copy, and finally "make up" or arrange the type in the page, so that when you read "Camouflaged" tomorrow you can see that after all it is possible for one man to almost run a newspaper. However, we know that Mr. Bell will more than have his hands full in swinging into line to catch up with the remarkable series of adventures just related by Congressman Baer. Read the story tomorrow.

HINES DISMISSES EXPORTS BOARD

Dissolution of the exports control committee was announced today by Director General Hines. His labors will end formally March 1. This body had supreme control of all exports for account of the American expeditionary forces and allied governments.

Duties of the committee will be assumed by Conrad E. Spens, who today was named assistant director of traffic of the Railroad Administration. Spens was vice president of the Burlington railroad.

Members of the exports control committee were Maj. Gen. George W. Goethals, representing the army; Rear Admiral C. J. Peoples, representing the navy; George D. Austin, representing the Railroad Administration; P. S. Franklin, representing the Shipping Board; D. W. Cook, representing the allied traffic executives, and R. L. McKellar, the secretary. Austin has acted as chairman of the committee.

There is nothing of the "road" about the brilliant attraction which Charles Emerson Cook will present at the National Theater next week, beginning Sunday, when for the first time here that brilliant and clever little comedienne, Florence Nash, will be seen in the sparkling new French comedy "Remnant."

Under direct from four months of success at the Morosco Theater in New York this play also carries the usual endorsement of a full year at the Gayety Theater in Paris, and seven months at the Royalty in London. It was written by the well-known Parisian author, Dario Nicodemi, and translated for the English stage by Michael.

That splendid actor, Orrin Johnson, well known throughout many successful seasons, is featured with the star, and will include Walter Regan, Harold Howard, Ben. R. Graham, Clare Weldon, and Dorothy Cheston.

POLIS.

At Poli's Theater next week will be the return of "Oh Boy," it having been here only recently at the Belasco. The business was so enormous, and the popular demand for its return was so great, that it was decided to return, this time at the Poli Theater.

In this cast are promised the selfsame players who created their respective roles. In it are included Anna Wheaton, Hal Forde, Elaine Wilson, Augusta Haviland, Stephen Maley, Harry Quayle, Jack Raffael, Ethel Forde, Jack Merritt, Ralph O'Brien, Helen Francis, Margaret Mason, and the ensemble of youth, beauty and charm for which the Princess is famous.

The box office of "Oh Boy" are exceptionally bright and witty, and are by Guy Bolton and P. G. Wodehouse, while the music, by Jerome Kern, is of the humming and whistling type that lingers long in the memory. "Till the Clouds Roll By" and "An Old-Fashioned Wife" are just two of the many song hits in the piece.

BELASCO.

The same combination of author and composer responsible for those joyous musical successes, "You're In Love," "Katrinka," "High Jinks," and "The Firefly," has again been brought into prominence by the announcement that "Tumble In" will be presented here at the Belasco Theater next Sunday evening.

In presenting this Arthur Hammerstein is said to have secured a chorus of youthful vigor and vim.

"Tumble In" also boasts an unusual cast of principals, including such favorites as Zola Sears, Charles Ruggles, Peggy O'Neill, Edna Hibbard, Virginia Hammond, Roland Hogue,

A Washington Girl Who Has Reached Stardom

MISS MARIE CARROLL, Who is starring in "The Kiss Burglar," at Poli's, is a Washington girl who got her first recognition in the Poli stock company here.

Chopin Polonaise, a McDowell group, including "To the Sea," "Witches' Dance," and "Hungarian." Arensky's "Etude in F sharp, major," the Rachmaninoff Prelude in G minor, and Liszt's Second Rhapsody.

Tickets may be had at T. Arthur Smith's office, 1306 G street.

JOHN MCCORMACK.

John McCormack, the popular tenor, will give his first recital this season at Poli's Theater tomorrow afternoon at 4:30, under the management of Mrs. Wilson-Greene. Mr. McCormack's recital was scheduled for January 10, but owing to a cold it was postponed. All tickets issued for January 10 are good for this date.

JASCHA HEIFETZ.

Jascha Heifetz, the young violinist, will appear in his only Washington recital of the season at the National Theater this afternoon at 4:30 o'clock.

Heifetz, who is only eighteen years old, has already acquired a great following among music lovers. He is a pupil of Auer.

NEWMAN TRAVEL TALK ON "WARTIME ENGLAND"

E. M. Newman's final travel talk in his series on "Wartime Europe" will be given this afternoon and evening at Masonic Temple Auditorium. Newman's "Wartime Europe" is the title and it covers the whole of the "tight little island," revealing the once sleepy England of the days of Dickens alive and thrilled with dramatic energy to meet the demands of the great war. Four years of war have worked marvelous changes in England—social ranks have been leveled and women have taken the places at forge and plow of their fighting men.

Interesting motion pictures, colored slides and a story of the war will make this final travel talk one of the best of the series.

Tickets are on sale at T. Arthur Smith's office, 1306 G street.

D. C. CARS MUST USE SAFETY AIR BRAKES

Safety airbrakes will soon be ordered equipped on all cars of the Washington Railway and Electric Company and the Capital Traction Company by the Public Utilities Commission. The commission today notified officials of the two companies of its intention to issue such an order, and asked for information on the subject.

Should the order be put in effect, it is pointed out, it will probably result in the lessening of street car accidents. It will also eliminate the demands of the railway union employees for 5 cents an hour additional for motorman operating hand-brake cars.

All of the double-track cars of the Capital Traction Company now are equipped with airbrakes, and the order will affect only a small number of its work cars. However, the Washington Railway Company operates about 125 cars by hand brakes. The company estimates it will cost about \$75,000 to install airbrakes on these cars.

The commission has issued an order approving the application of the Union Transfer Company to establish a new rate for the delivery of baggage in new zone extending to distant points within the District line. The company will be allowed to charge \$1.25 for a single piece of baggage, a trunk, for instance, within the new zone and for additional piece of baggage, and 75 cents for hand baggage.

BEQUEATHS \$500 TO GREEK CHURCH PASTOR

The Rev. Joakim Alexopoulos, pastor of the Greek Church here, was remembered with a bequest of \$500 in the will of Nicholas J. Demas, who died October 2. The priest was an uncle of the testator, who conducted a luncheon at 1213 Pennsylvania avenue northwest, at the time of his death. The interest in this establishment was given to a cousin,

These City Physicians Explain Why They Prescribe Nuxated Iron TO MAKE HEALTHIER WOMEN AND STRONGER STURDIER MEN

Now Being Used By Over Three Million People Annually.

By enriching the blood and creating thousands of new red blood cells, it often quickly transforms the flabby flesh, toneless tissue and pallid cheeks, of weak, anemic men and women into a healthy, robust condition. It increases the strength of delicate, nervous, run-down folks in two weeks' time in many instances.

It is conservatively estimated that over three million people annually in this country alone are taking Nuxated Iron. Such astonishing results have been reported from its use both by doctors and laymen, that a number of physicians in various parts of the country have been asked to explain why they prescribe it so extensively, and why it apparently produces so much better results than were obtained from the old forms of inorganic iron.

Extracts from some of the letters received are given below.

Dr. Ferdinand King, a New York Physician and Medical Author, says: "There can be no vigorous iron or healthy robust checked women without iron. Pallor means anemia. Anemia means iron deficiency. The skin of anemic men and women is pale; the flesh flabby. The muscles lack tone, the brain fails and they become weak, nervous, irritable, dependent and melancholy. When the iron goes from the blood of women the roses go from their cheeks. I have strongly emphasized the fact that doctors should prescribe more organic iron—Nuxated Iron—for their nervous, run-down, weak, haggard looking patients."

Dr. A. J. Newman, late Police Surgeon of the City of Chicago, and former House Surgeon, Jefferson Park Hospital, Chicago, in commenting on Nuxated Iron, says: "This remedy has proved through my own tests of it to be a most effective remedy for the blood, for the nerves, for the digestive disorders."

Dr. James Francis Sullivan, formerly physician of Bellevue Hospital (Out-door Dept.), and the Westchester County Hospital, in my opinion a careful examination of the for- mulation of the Nuxated Iron by any physi- cian or pharmacist should convince him that it is to be placed among the very highest class and most strictly ethical preparations known to medical science. It exceeds anything I have ever used for building up the system and increasing the red blood corpuscles. It is a most effective and fortifying the blood against the ravages of disease."

Dr. Schuyler C. Jacques, formerly physician of St. Elizabeth's Hospital of New York City, said: "I have never before given any medical information or advice for publication. As I ordinarily do not believe in it, but in the case of Nuxated Iron I feel it would be remiss in my duty not to mention it. I have taken it myself and given it to my patients with most sur- prising and satisfactory results."

Dr. T. Alphonso Wallace, a physi- cian of many years experience and formerly of the British Naval Medical Service says: "I do not make a practice of recommending advertised medicinal products, but I have found Nuxated Iron so potent in nervous, run-down conditions, that I believe all should know of it. If people would only take Nuxated Iron

The skin of anemic men and women is pale; the flesh flabby. The muscles lack tone, the brain fails and they become weak, nervous, irritable, dependent and melancholy. When the iron goes from the blood of women the roses go from their cheeks. I have strongly emphasized the fact that doctors should prescribe more organic iron—Nuxated Iron—for their nervous, run-down, weak, haggard looking patients."

Dr. A. J. Newman, late Police Surgeon of the City of Chicago, and former House Surgeon, Jefferson Park Hospital, Chicago, in commenting on Nuxated Iron, says: "This remedy has proved through my own tests of it to be a most effective remedy for the blood, for the nerves, for the digestive disorders."

Dr. James Francis Sullivan, formerly physician of Bellevue Hospital (Out-door Dept.), and the Westchester County Hospital, in my opinion a careful examination of the for- mulation of the Nuxated Iron by any physi- cian or pharmacist should convince him that it is to be placed among the very highest class and most strictly ethical preparations known to medical science. It exceeds anything I have ever used for building up the system and increasing the red blood corpuscles. It is a most effective and fortifying the blood against the ravages of disease."

Dr. Schuyler C. Jacques, formerly physician of St. Elizabeth's Hospital of New York City, said: "I have never before given any medical information or advice for publication. As I ordinarily do not believe in it, but in the case of Nuxated Iron I feel it would be remiss in my duty not to mention it. I have taken it myself and given it to my patients with most sur- prising and satisfactory results."

Dr. T. Alphonso Wallace, a physi- cian of many years experience and formerly of the British Naval Medical Service says: "I do not make a practice of recommending advertised medicinal products, but I have found Nuxated Iron so potent in nervous, run-down conditions, that I believe all should know of it. If people would only take Nuxated Iron

Dr. Ferdinand King, a New York Physician and Medical Author, says: "There can be no vigorous iron or healthy robust checked women without iron. Pallor means anemia. Anemia means iron deficiency. The skin of anemic men and women is pale; the flesh flabby. The muscles lack tone, the brain fails and they become weak, nervous, irritable, dependent and melancholy. When the iron goes from the blood of women the roses go from their cheeks. I have strongly emphasized the fact that doctors should prescribe more organic iron—Nuxated Iron—for their nervous, run-down, weak, haggard looking patients."
